

The Date of the Gilgamesh Epic

The date of the Gilgamesh Epic is derived from the poem Inanna's Descent To The Nether World. It is also Damuzi's descent to the netherworld. This poem is about astral configurations for an important year of event. Inanna the name for the planet Venus means (Nanna) great mother. And Damuzi is the name for Mars. Damuzi is called The Leader (of the calendar new year), and when reborn in its rising, its birth is called The Son (Mars) and thus Marduk. The poem includes the statement that Venus dies and is reborn in her glory. This refers to the short-term death of Venus passing in front of the sun, where its narrow crescent gets very bright. Though its angular distance from the sun can allow its "death" (absence) to be seen in as little as 4 days apart, the back dark side toward the Earth makes it a common requirement for 8 days to begin seeing any crescent. At this time of rising or resurrection, the poem states that Mars was opposite the sun, and did its turn about or its turn in Scorpio. Thus this is not the same poem as Venus rising and finding the opposition of Mars in the Gazelle, or in other constellations. Every common translating scholar seems to think that it's a reference of the god Damuzi by magic being turned into a scorpion or gazelle.

This poem is written in language that matches the texts of the 17th century BC, and so it is no surprise to find this true as Amizaduga's year 1645bc. But the astral event of that year is similar to the one that took place in 2040bc while Noah was still alive at the age of 930, the same age Adam died at. There was reason to fear death in this year because Peleg was 230 and would die a mere 10 years later in 2030bc. And because astral events are never the same for all planets on any day or year, the copy of a recording at the time the event is thought to occur again can easily be changed by the actual new positions of that re-recorded year. The poem for 1645bc should not be the same as 2040bc, because the sky is not the same. The data of any memorial if recorded will corrupt the true original. An example is like that of every Sunday Nisan 16 of the moon is not going to be April 5 of the sun; and every Sunday April 5 of the sun isn't going to be Nisan 16 of the moon. And if these three occur again, That of Sunday on April 5 on Nisan 16, they will not have the same stars behind the sun nor the moon.

Thus the copy of the 2040bc Gilgamesh Epic in 1645bc will either be an actual direct copy of the originals, or altered in the belief the exact same astral locations exist (of which they do not, and can't ever). This is how everything ever written is when dates are concerned.

We can be sure that in 1645bc that priests definitely had not made a decision to claim Noah had died and was in the netherworld with his wife. This is true because Amizaduga locked in the verification that Adam was 2400 years ago at Amizaduga's death in 1625bc. As such, that means Noah was not yet dead in 2040bc. It is not until 747bc that Babylon miscalculates the Flood as 2947bc and thus Noah as dying in 2597bc which is 557 years before 2040bc (ten years before Peleg's death). Or, miscalculating Peleg's death as year 740 in 2207bc, then presuming Gilgamesh saw Noah ten years before it in

2217bc, Noah's death is still 380 years before Gilgamesh's quest and 390 before Peleg's death. This is why the Epic exists in two versions with or without wife. The poem of Noah with his wife is dead with her, and so the version without wife must be realized as still alive, not dead yet, sometime after his wife's death. This would explain why Gilgamesh goes to Ararat and Noah is not there, he has moved on across the water (the sea, not the underground river of the dead).

A mistake made about underground spring water is to assume it is in the netherworld or in Hades. What most people do not realize is that religious myth and astronomy are opposite directions. If the upper world has 7 layers, then so does the underworld. If it has 9 layers, then so does the underworld. The error in religious myth is to place the orbits or layers in the same direction when they are concentric circles. The underworld which is underfoot is presumed to have its deepest layer above the center of the Earth so that its highest layer is the graves just underfoot. This is not true. In astronomy, everything highest above sky, becomes lowest below planet Earth, or below the soil, the earth. Saturn as highest in the sky then orbits under the Earth making its orbit the lowest below your feet or below earth. Mars which orbits not as high as Saturn thus goes under the Earth and is higher than Saturn. The passage of Mars under the Earth is not as deep as it is for Saturn. So the concept of the path and the river is not actually thru soil into graves, but rather in the sky and heavens going under the earth. It is a primitive ignorant way of seeing astronomy visually as is, without the explanation of graphic drawings to explain. In this way modern space exploration movies have cleared up much ignorance though creating so much other lies too.

Because Earth is the 3rd planet, both Venus and Mars go behind the sun. But the orbit of Mars then comes opposite the sun as 4th in orbit of it, while Venus goes in front of the sun being 2nd in orbit from it. Naturally this confused many as to which planet was deeper when descending under Earth each day. Primitive indeed, but information gathered from even ignorant people is not useless because it unveils their perception where you haven't been. Thus it is a matter of sorting their truth from their lie from their misconceptions of what they saw.

Most people do not realize that when Jesus said do not hold children back from me, he meant more than saying that he was there to teach children too because the kingdom is theirs and will come much later when their parents are dead. He meant more than he can teach them too. He definitely learned from children otherwise he would never appreciate scripture that says the Christ to come will be a mere child who leads them all. All chosen by Jehovah will have others around them who are older and with that one excuse alone they will say this is not the Christ because he/she is too young. They did that to Moses before Jesus, and they do that to newborn churches. But this is one reason Jehovah took the oldest of his sons and made him younger than his father king David so that as The Son (the reborn Son, Marduk) he would be the king as the first humans were. Namely, the first sons in Ur and Erech were made "elder" (king) in their youth to trust that a child tutored by an older teacher (priest) can know more than his father, as Jesus (our Lord) knew more than David.

The Actual dates

It is more than just a different astral story on record for 1645bc than its original 2040bc for Gilgamesh. The dates vary also because Egyptian calendar of 365 days did not exist until the July 12 Epagum days of 2030bc for its new year of Pamenot 1 on July 17. Unlike ancients since Maya of 1314bc and Ramses in 1290bc who believed the 365-day calendar began in 2774bc or 2770bc, the dates for Gilgamesh can only be 360-day calendar. Thus the following true dates exist despite any other recalculations and miscalculations found in records or copies after the actual event.

The Calendar dates for the Gilgamesh Epic

	<u>Julian</u>	<u>Noah's 360</u>	<u>Egyptian 365</u>
2370bc	Oct 12	1-01-600 (1656am)	(1-03- 00)
2233bc	Oct 12	1-01-739 (1795am)	(1-03-137)
	plus	730x 360 days	= 720x 365 days to 1513bc
2041bc	Dec 23	1-01-934 (1990am)	(7-10-329 =N.929 =1985am)
2040bc	Apr 26	5-05-934	(11-14-329
2040bc	Dec 18	1-01-935 (1991am)	(6-05-330 =N.930 =1986am)
2039bc	Dec 13	1-01-936 (1992am)	(5-30-331 =N.931 =1987am)
2031bc	Nov 1	1-01-944 (2000am)	(4-18-339 =N.939 =1995am)
2030bc	May 6	7-17-944	10-24-339
	July 12	9-24-944	E - 1 -339
	July 17	9-29-944	1-01- 340 (N.940 =1996am)
2029bc	May 5	7-22-945 (2001am)	10-24-340
	Flood's 730x 360 days		= 720x 365 days
1650bc	Apr 13	12-29-1330	1-01-720 (N.1320 =2376am)
	Apr 15	1-01-1330	1-03-720
1646bc	Mar 25	1-01-1334	12-13-723 (N.1323 =2379am)
	Apr 12	12-19-1334	1-01-724 (N.1324 =2380am)
1645bc	Mar 10	12-22-1334 Venus	11-29-724
	Mar 19	1-01-1335	12-08-724
	Apr 11	1-24-1335	1-01-725 (N.1325 =2381am)
1644bc	Mar 14	1-01-1336	12-03-725
	Apr 11	1-29-1336	1-01-726 (N.1326 =2382am)
1513bc	Mar 9	11-24-1469	1-01-857 (N.1457 =2513am)
	Apr 15	1-01-1469	2-08-857

The death of Peleg Mesanipada occurs on May 6 of 2030bc in the year 944. The Hyksos have already left Ur and Ararat and arrived in location to found the city Noph Mizraim which will become Memphis Egypt 700 years later (the name Egypt from Egyptus the Greek name for Sethosis the brother of Raamses). This arrival in 2030bc before May 8 is required because the foundation requires a 70-day observation of the star Sothis being absent as the sun passes its celestial longitude. The record of Manetho thought Adam was 5500bc (3600 years before 1900bc as the first kingship of Babylon) and that the name Man or Men (Menes) was given to Adam when he died at 930. Thus he thinks this 70 days and 70 kings was in 2770bc until July 17. Few people note the discrepancy in the LXX labeling of the Septuagint where LXX means 70 and the words Sept-Tua means 72. For this reason it goes unnoticed that there are two traditions and the one of 72 men is the truth not 70 men. The reason is that at Alexandria one degree of 69 miles north of Memphis the star is absent 72 days not 70.

The mass suicide in the city of Ur of the two princes (Nahor-)Alumdug and (Haran-)Meskalumdug with their polygamous wives and servants to join Peleg in heaven is thus definitely 2029bc (and not the central 2030bc radiocarbon-14 dating of which one year is petty to argue

in C14). It is thus crucial to know Peleg's death and that Noah's new year of that death is ALL SAINTS DAY (2031bc Nov 1) to determine just when Gilgamesh made quest to ask what is causing a cut of 700 years in longevity. The absolute certainty that Egyptian calendar began in 2030bc (not 2029bc) is because this suicide in 2029bc is dated as Koiak 24. To have such a date (10th month 24th day) requires its new year in 2030bc. Nor can the calendar be earlier because it was the knowing that Peleg was about to die and that the decision was being discussed to go with him that disgusted the elders (kings) and sent them on their way to Ararat where Shem would lead them to Canaan, and most would choose to move onto Egypt.

It is now clear that Gilgamesh was not part of this Hyksos panic. He was wise or saw it coming so that he did not follow suit of the Hyksos in his trip to Ararat (and then Kittim Cyprus), but rather they followed in suit of him. Thus it was not Hyksos 2031-2030bc then Gilgamesh 2030-2029bc, but rather Gilgamesh is 2040bc by pinpointing the dating of Mars in Scorpio to being Noah's 930 years (the same age as Adam had died). Clearly, the young male population of 230 years was equally as old as Noah without having lived the 700 years to get there. The evidence is supportive in that year 740 of Greek Flood 2958bc (2957-2217bc) is regarded as Peleg's death but 10 years before NeoBabylon's Flood 2947bc places year 740 of Peleg's death in 2207bc as 1st dynasty Ur's kingship of (Reu-)Aanipada. The 10-year difference does occur because Babylon's Arpaxad is 2945bc and 13 years after Greek Flood 2958bc. This is the difference between debating 950 years as 360-day or 365-day; (936x 365 days = 949x 360 days). But the fact that they are laid out to create this 10-year difference in Peleg's death of 2217bc or 2207bc strongly implies Gilgamesh making his trip 10 years before Peleg died. Another factor that probably confused them is that Gilgamesh did not give up his kingship (a rule of 126 years from 2157-2031bc) to go on the quest. Either his own death, or that of the world is why his rulership ended after ALL SAINTS DAY new year. This is why his age of longevity had to be clearly about that of Peleg. It also indicates that modern scholars cannot equate Gilgamesh as being Nimrod who died in 1770bc (2256am) at the age of 500 when baby Judah was born to Jacob Israel in Syria.

Today's texts however recognize the 1000s of copies of the Gilgamesh Epic written in the 17th century BC. They thus think it is younger than the Xisuthros poems which speak of the resurrection of Noah being raptured 40 days. The return of the astral date in 1645bc causes the original 2040bc to go unnoticed as preceding Noah's death in 2021bc on Christ-Mass eve Dec 24 in our Greek 10th month whose séance at Babel last until Feb 2 (Thoth 24 the Zoroastrian Christ-Mass in its 10th month) falling on Noah's 5-27 in 2020bc as the Chinese 60-day cycle confused with Noah's 3-27 in 2369bc (Jan 6) as day 40. It is the Egyptian dates of 7 days to pack the ark and 40 days for the ark to be raptured that matches the Egyptian dates this year in 2011-2012 AD being thrice 1460 years. Remarkably, the 7-day preparation of Jesus which Jehovah required for him to be raptured 40 days matches these exact same Egyptian dates of Noah's Flood (a

match in any 365-day calendar). The dates of Jesus in 33 AD do not match the dates of Noah's death and the spirit (Xisuthros or Christos) who falsely claimed to be Noah raptured for 40 days.

Few people thus realize the panic the whole world experienced in death for those 10 years from Gilgamesh to Peleg (2040-2030bc), and from Peleg to Noah (2030-2020bc). It is much like when 1975 became the year 6000 and for 10 secret years masses of people picked up HIV in epidemic proportions to produce the mass of deaths of AIDS in 1984, the 10th year. All too often people of all walks of life chosen by Jehovah or not chosen will always presume that what Jehovah has revealed due to deliberate ignorance by people is thus things that do not exist yet, or things he didn't want anyone to know. This as if because Jehovah can and does reveal and push his spirit to force truths out, that the opposite must be true and that he hides knowledge and blocks sight of it as if wanting the bad results or deaths as if to teach a deserving lesson. It definitely puts question on who to blame or credit when all Israel is not permitted to follow Joshua and Caleb into Canaan but rather must be punished and die with the 10 bad men chosen by those 10 tribes. Indeed even the two tribes who picked two good men then die with the decision of the 10 men rather than go thru with these two men. Was it Jehovah, or was it Moses! None the less it happened. Do we look back at what happened between 900 years of Adam and Eve and then say this was Jehovah and what he wanted!

So now knowing Gilgamesh and Peleg and Noah leaves a decision to make. Will the Lamb succeed in sparing life or will all see death. The Lamb gathers 7 days knowing that death will take away the body as it did Jesus

raising it for 40 days. Because warning the children banned in the locked rooms was more important. Indeed Jesus was correct that his losing his life was like that of Rachel giving birth to Benjamin. Without Benjamin, an alternative way would have been required to get Joseph's father to come to him in Egypt to save his family from the famine. But a woman gives her life to the child to be born, and this is what Jesus did because his wife will proudly do so also.

Venus (Inanna) is reborn when Mars (Damuzi) opposes the sun and is turned into The Scorpion

Inanna Venus has been reborn in the east at sunrise from her 1- to 8-day death to find Damuzi Mars opposing the Utu the sun. (rising east when sun sets west, and setting west when sunrises east) causing Damuzi to be turned into the Scorpion (backup). So Damuzi is then sent to the underworld at the same place Inanna Venus was as her replacement for death having freed her. It takes Mars about 345 days to go from exact mid-opposition to its last western set with the sun. But the meeting of Venus only occurs every 395 years give-or-take 32 years.

The Phoenix (Venus) of Nimrod's 1770bc rising with Sothis in July cycles all 5 points in 1215 years (5x243) but meets Egyptian dates in 1458 years making many scholars insist that the Sothic Phoenix is 1460 years

Thoth Marduk dates are 156 years and so also 312 years
 Thoth Phoenix is 312 years. Both Thoth Marduk and Thoth Phoenix honored every 936 years be it 3744 = 4x 936 or 2808 = 3x 936. Year 3192 is 360-day 855bc and 365-day 834bc March 20 Thoth so deciding in 747bc that 3192am was not 834bc but 2009bc January 8 Thoth and debating whether 360-day reckoning was 7-01 (Jan 10) on Thoth 3, or 6-26 (Jan 5) on Epagum 3. The correct correlation looks down Marduk Street away from the tower for a new year 966 (July 8) on Epagum 3 with a Pamenot new year (July 11).
